– Keymaps are automatically loaded on the VeryLazy event – Default keymaps
that are always set: https://github.com/LazyVim/LazyVim/blob/main/lua/lazyvim/config/keymaps.lua
– Add any additional keymaps here

– Import the Util module local Util = require("lazyvim.util")

– Use safe_keymap_set for safe key mappings local map = Util.safe_keymap_set

local current_file = vim.fn.expand("%") map("n", "pdf", ":!quick_pdf.sh
/home/falk/Documents/standard.md", { desc = "Open current file as pdf in
zathura" })
